

HOTONE

“Skyline” Series Stompboxes

OCTA

Owner’s Manual

THANK YOU FOR PURCHASING A **HOTONE** PRODUCT!

Octa is a digital octave stompbox for both guitarists and bassists.

Two octave voices blend with dry level control and support polyphonic processing in the default mode, so playing a chord is absolutely no problem.

And there is an additional DIRTY mode which simulates the classic analog octave pedals (single note processing and a different tone).

OCT1: Controls the volume of 1st octave, 1oct down in both modes.

OCT2: Controls the volume of 2nd octave, 1oct up in default mode, 2oct down in DIRTY mode.

DRY: Controls the dry signal volume.

DIRTY: Switches to an old school octave sound mode.

“DC IN”: Input for 9V DC adapter (center negative).

Specifications

Current Consumption: X mA

Dimensions: X mm Width x X mm DEPTH x X mm Height

Weight: X g
